## Research Interests

My primary research area is robotics, with strong themes of hardware design, algorithms, and system design. My current research focuses on modular reconfigurable robots, which adapt to new tasks by transforming between different morphologies, such as a car to maneuver on flat ground, a snake to climb stairs, or an arm to pick up and place objects. My proposed future work extends the theme of robot adaptation to the environment: I propose to create robots that transform their environments by adding physical structures that establish favorable conditions under which they can more easily move, sense, and complete tasks.

## Education

2012–2018 **Ph.D Student, Mechanical Engineering and Applied Mechanics.**  
(expected) *University of Pennsylvania GRASP Lab, Philadelphia PA*  
Advisor: Mark Yim

2008–2012 **BSE, Mechanical and Aerospace Engineering.**  
*Princeton University, Princeton NJ*  
Certificates in Computer Science and Robotics

## Honors

2017 **John A. Goff Award, University of Pennsylvania.**

Highest academic award for a Ph.D student in the Mechanical Engineering and Applied Mechanics department, awarded annually

2017 **Best Robotic Video Award, 2017 ACM International Joint Conference on Artificial Intelligence.**

For “An End-to-End System for Accomplishing Tasks with Modular Robots: Perspectives for the AI Community”

2016 **Best Systems Paper Winner, and Nominee for Best Student Paper and Best Conference Paper, 2016 Robotics: Science and Systems Conference.**

For “An End-to-End System for Accomplishing Tasks with Modular Robots”

2014–2018 **NSF Graduate Research Fellow, University of Pennsylvania.**

2014 **Best Automation Paper, 2014 IEEE International Conference on Robotics and Automation.**

For “Self-Assembly of a swarm of autonomous boats into floating structures”

2012 **Donald Janssen Dike Award, Second Place, Princeton University.**

For Excellence in Undergraduate Research

2011 **Tau Beta Pi**, *Princeton University*.  
Engineering Honor Society

---

## Academic Advising and Management

2014–2017 **SMORES-EP Project Lead**, University of Pennsylvania.

**Mentored a total of 24 students** over the course of the project (2 junior Ph.Ds, 8 Master's, 11 undergraduates, 3 high school). The team was largest in summer 2015, with 15 students working under me to design, build, and program the SMORES-EP robot system.

2013–2014 **NSF REU Mentor**, University of Pennsylvania.

Mentored three summer interns through the NSF Research Experience for Undergraduates program.

- **Jean Mendez** (University of Puerto Rico), 2013. Real-Time Kinematic Retargeting with CKbots.
- **Terry Sun** (University of Pennsylvania), 2013. Real-Time Kinematic Retargeting with CKbots.
- **Kam Hou U** (Stony Brook University), 2014. Wireless communication networking for SMORES-EP.

---

## Teaching

Jan 2018 **Teaching Certificate**, *Center for Teaching and Learning*, University of Pennsylvania.  
(Expected)

Attended teaching workshops, and will undergo a lecture observation

2013–2014 **Teaching Assistant**, University of Pennsylvania.

Responsibilities included weekly tutorial sessions and office hours, grading lab reports, and some lecturing.

- MEAM 347 Core Laboratory (Fall 2014)
- MEAM 516 Advanced Mechatronics in Reactive Spaces (Fall 2014)
- MEAM 210 Dynamics (Spring 2014)
- MEAM 510 Mechatronics (Fall 2013)

---

## Journal Articles

## Invited Talks

- May 29, 2017 **“PaintPots: Low cost, Accurate, Highly Customizable Potentiometers for Position Sensing”**, *2017 IEEE International Conference on Robotics and Automation*, Singapore, Singapore.
- Oct 10, 2016 **“Design and Characterization of the EP-Face Connector”**, *2017 IEEE International Conference on Intelligent Robots and Systems*, Daejeon, Korea.

- Aug 16, 2016 “**Addressing Tasks with Modular Robots**”, *MEAM Department Ph.D Seminar*, University of Pennsylvania, Philadelphia, PA.
- Sept 15, 2015 “**Self-Assembly of a Swarm of Autonomous Boats into Floating Structures**”, *2015 International Symposium on Robotics Research*, Sestri Levante, Italy.
- Sept 12, 2015 “**Computer-Aided Compositional Design and Verification for Modular Robots**”, *2015 International Symposium on Robotics Research*, Sestri Levante, Italy.
- Nov 17, 2014 “**A General Method For Kinematic Retargeting**”, *2014 ASME International Mechanical Engineering Congress and Exposition*, Montreal, Quebec, Canada.

---

## Employment

- June–Aug 2012 **Data Scientist**, *Knewton*, New York, NY.  
Developed collaborative filtering algorithms to estimate student progress through adaptive online courses.
- June–Aug 2011 **NSF REU Summer Intern**, *University of Southern California Interaction Lab*, Los Angeles, CA.  
Developed a general system for kinematic retargeting, which was later published.
- June–Sept 2010 **Engineering Intern**, *W.L. Gore and Associates*, Elkton, MD.  
Developed test methods and apparatus for fitness-for-use testing of medical membranes.

---

## Service and Outreach

- 2012–Present **Tour Guide**, *GRASP Laboratory*, University of Pennsylvania.
- 2012–Present **Ad-hoc Reviewer**, *IEEE Robotics and Automation Letters*, *Autonomous Robots*, *Robotics: Science and Systems*, *IEEE International Conference on Robotics and Automation*, *IEEE International Conference on Robots and Systems*, *ASME International Mechanical Engineering Congress and Exposition*.

---

## Robotic Art

- Dec 2014 **Orpheus and Euridice: Electromechanical Redux**, *Slought Foundation*, Philadelphia, PA.
- Collaborated with faculty and students from PennDesign and PennEngineering as well as members of the Philadelphia Opera and Curtis Institute of Music to develop a modern, mechatronic retelling of the classic opera. The performance featured professional opera singers and musicians interacting with electromechanical devices to tell the story of Orpheus and Euridice.
